

ARC MAX WRIMATIC

GENERAL DESCRIPTION

The big brother of the ARC One model. An evolution that provides greater performance in terms of comfort and aesthetics to the ARC family of seats, designed for auditoriums and conference rooms, where comfort, functionality and versatility are characteristics that prevail in the choice of the seat with which these spaces should be equipped.

The ergonomic shapes of the seat and backrest, and especially the lumbar support, allow the user to adopt a correct posture when using the seat, and provide a high degree of comfort, in a fully upholstered backrest version, with a height of 89 cm.

With the seat folded down, the depth of the seat is only 37.5 cm (38.5 cm in the version with tiered front attachment), which still provides wide circulation aisles. The seat is folded by gravity and silently, by means of a maintenance-free mechanism.

With the addition of the Wrimatic writing stand, the ARC Max model is a very good alternative to other educational seating concepts, as Wrimatic provides the user with a large and rigid work surface of 300 x 425 mm, which allows the use of laptops and tablets in a very comfortable way. It is suitable for use by both right-handed and left-handed users.

Designed by an aeronautical engineer, Wrimatic™ is the only folding writing stand tested to withstand a load of 240 kg. Its fastening and folding mechanism is based on a triangular "prismoid" swivel joint, made of stainless steel. The rest of the elements that make up its support are made of cast aluminum.

The folding is performed manually in a smooth and continuous movement. The support surface is made of ABS and has a thickness of 10 mm. This material is highly resistant to impact, heat and scratches.

In addition, it has been designed to be adapted to Turn & Learn systems, which allows to have an armchair with great features fixed to the floor, which in its use allows a 360° turn so that the user can turn its position in the room, depending on the needs of each act.

USES AND APPLICATIONS

With a minimum distance between axes of only 49 cm, it can be installed individually or on benches, either fixed to the floor or to the riser of the grandstand. It can also be installed in straight rows or curved rows.

The versatility that characterizes its design allows it, as with the ARC ONE model, to grow in performance with the incorporation of various complements:

- Individual or shared armrest.
- Side panel upholstered armrest.
- Acoustic interaction of the armchair in the space through seat panel perforations.

Community house - Oslo, Norway

ECO-FRIENDLY

This product allows the use of upholstery woven with polyester yarns made from recycled PET bottles. In addition, to ensure the closing of the materials cycle, each and every element used in its manufacturing can be recycled separately, thus reducing the ecological footprint.
