

SITBOOK

GENERAL DESCRIPTION

A simple and practical concept halfway between a comfortable seat for sports stadiums and arenas, and a minimalist armchair.

The seat is designed with space optimization in mind, and its installation in telescopic platforms, so that the folding mechanisms that need to be incorporated for its folding on the platform disappear, avoiding possible maintenance problems.

Folded forming a block of only 9 cm thick, it is ideal to maintain very wide passages and evacuations, without affecting the comfort of the seat.

The set consists of two 2 mm thick steel plate fairings formed in press, with dimensions of 47.5 x 45 cm.

A steel cylinder of 6 cm in diameter and 42 cm in length will allow the union of the seat and backrest covers, acting as the axis of rotation of the seat in the folding movement, Seat and backrest cushions made of cold-molded polyurethane foam, finished with a cover made of fireproof fabric.

USES AND APPLICATIONS

With a width of 45 cm, the Sit Book armchair can be installed at a minimum distance between axes of 46 cm. The height of the backrest is a comfortable 87.5 cm and the depth of the armchair with the backrest or seat open is 55 cm.

The versatility of the Sit Book chair allows it to be installed in different ways:

- On telescopic platforms, with direct attachment on top of the platform.

- On telescopic platforms with a row-rise of only 18 cm and front attachment to the riser. Installed individually or in groups of 2 and 3 seats.

In addition, it can incorporate a folding armrest, finished in solid beech wood or upholstered, which will fold automatically in a joint movement with the folding of the backrest. Seat numbering.

ECO-FRIENDLY

This product allows the use of upholstery woven with polyester yarns made from recycled PET bottles. In addition, to ensure the closing of the materials cycle, each and every element used in its manufacture can be recycled separately, thus reducing the ecological footprint.
